

CLARICE SPICKER CO-PRESENTS “ACCIDENT RECONSTRUCTION” FOR USLAW’S COURTROOM ACADEMY

JSH partner [Clarice Spicker](#) co-presented “Accident Reconstruction” during USLAW’s Courtroom Academy: The

Use of Experts at Trial. USLAW’s Future Leaders Group hosted the 2-day virtual Academy for 60+ lawyers and experts on November 5 and 6, 2020. Clarice joined Kari A. Verner, Ph.D., from [S-E-A, Ltd.](#), a forensic engineering, fire investigation and visualization services company specializing in failure analysis.

Most cases do not have the crisp video evidence necessary to completely depict an incident as it occurred. That is where the accident reconstructionist comes in. Clarice and Kari discuss how an incident lost to time can be recreated and portrayed to the jury in a favorable way for your case.

The **USLAW NETWORK Future Leaders Courtroom Academy** addresses the ins and outs of direct and cross-examination, with a focus on expert witnesses from S-E-A, USLAW’s official technical forensic engineering and legal visualization services partner. The 2-day Academy offers programming designed by and for future leaders. Topics include the importance of understanding the role of biomechanics in a personal injury case, the expert’s approach to preparing reports and withstanding Daubert challenges, technical tools available for experts to use as or with other demonstratives at trial, and basic principles of accident reconstruction. The second day of programming includes a mock examination of an expert conducted by an experienced litigator and leader within USLAW, followed by a moderated conversation about the use of experts at trial.
